The New York Sun does not agree with its Democratic contemporaries that there is just now no change going on in public sensees a change and a growth which it thinks s strongest in the South, and describes as way from the leadership of the soiltyled reformers, who have brought the modratic party to defeat, and in favor of the re-establishment of common sense n the management of the Democratic

be is not a Républican as he claims. The see the-negro relegated to the rear smucks too strongly of the old Bourbon slavery spirit. The negro is entitled to full protection in the exercise of his rights as a free citizen and the Republican party stands upon that platform. The talk about building up a' white Republican party in the South Is arrant nonsense.

The Boston Traveller goes for the third party clement that contributed to the election of Gov. Hill with a sharp pen: "Warble record as a Union soldier, a man of alious denomination, a man of upright charocter, a good neighbor and an exemplary clizes, was a caudidate for Governor in the State of New York. He stood in the fight for the homes of New York against saloons.' His opponent was David B. Hii: own as well to be a political tool mor gaged to the newers of the sulcond us, the dog trottlag along tinder the eart is known to be the property of the owner. There has not been in politicallife in this country. any such instance of degrading servisity to the political elements as Hill. There were enough temperance men who wasted their votes to have defeated Hill by 20,000 majoilty. It would have been a trlumph for the honor and good order of society so to do. How intelligent people feel who have to bear the responsibility by inlause of their ballots for such an insult to good. government remains to be explained."

to find vigorous advocates in the South. Gen. John D. Imboden, of Virginia, in a recent interview said: "I am hearly in favor of any movement that will organize and crystalize the 'protective" tariff gentinent of the whole country for the maintement of the whole country for the maintenance of the great "American aystem" of that incomparable atterms of a past generation, Henry Cay. Therefore, I am in favor of the proposed convention in the South, to inaugurate the subvement. But the time has come, I thick, when every political movement as important as the loss of the Rousshie Morgan company of New York, proposed should not be circumscribed by a sectional designation, no matter where a sectional designation, no matter where it originates. Held the convention by all means, as proposed but let the members come together with the purpose of laying the foundation of a structure co-extensive with the limits of this vast Union." The first great step, in my opinion, toward the settlement of the tariff issue is to repeal the internal reversio laws; and then the necessary deties to carry, on the Government, justly and fairly imposed on our 700,000,000 or 800,000,000 of annual imports, indiciously arranged with a view to foster our great industries by proper dis-eriminations, would afford all needful protection, and no doubt satisfy a vast majority of the intelligent people of the conntry. If Mr. Cleveland had understood the political philosophy, that placed him in power he never would have been guilty of the suspendous blundly of falminating his free trade "bill" in December, '87, compet-ling a solid North to rise in defense of its wealth against a splid South in the saddle, booted and spurred in the popular branch of Congress to carry out Southern Sdedu of financial position of congress to carry out Southern Sdedu of financial position of corry years ago, when there was but one great overshadowing in-terest in the Senth clave conducted agri-culture.
